PROJECTS

Portfolio Website, (Github) (Demo)   February 2025
Developed an animated and designed personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and achievements. Integrated interactive elements, animations, and a contact form with email integration.
NFTs, (Github) (Demo)   February 2025
Designed and developed a static NFT marketplace website using HTML and CSS. The project showcased a visually appealing and responsive UI, featuring NFT collections, artist profiles, and an intuitive layout optimised for seamless browsing. Focused on modern web design principles, structured layouts, and engaging aesthetics to simulate a real-world NFT marketplace experience.
Sundown Studios, (Github) (Demo)   January 2025
Developing a fully responsive and visually appealing **Sundown Studios Clone** using **HTML, CSS, and JavaScript**. Implemented an intuitive UI/UX design, smooth animations, and interactive elements to enhance user engagement. Focused on **pixel-perfect design, responsive layouts**, and optimized performance for seamless user experience across devices. Integrated **modern web development practices** to replicate the original studio's aesthetics while ensuring accessibility and efficiency.
Capstone Project, (Github) (Demo)   December 2024
Developed a fully responsive website using HTML and CSS as part of the First Semester Final Project. The project focused on creating an intuitive and visually appealing user interface while ensuring cross-device compatibility and modern design principles. Implemented structured layouts, adaptive media queries, and interactive styling to enhance user experience.

SKILLS

Computer Languages: Python, JavaScript, CSS, HTML
Software Packages: React
Soft Skills: Critical Thinking, Creativity
Others: Social Media
